

index .. things that are drafted for a certain space .. for a specific situation .. an institution maybe .. or just for someplace .. things that are worked out in detail or simply thought of .. things that could happen .. that could have been done .. that would be nice in a particular context .. maybe to see or to install .. or just to have ..

.. but .. that are not realised .. at all .. things that are not even described .. or recorded .. neither with text nor with sketches .. and nothing is told too .. so there is nothing really .. only a list .. indicating the numbers of ideas that came up .. that were thought for one place .. or a situation .. or another .. ideas that were matching .. that were relevant to imagine .. and that are forgotten again .. and nothing more ..

so this is it .. simply an index ..
